

TENNESSEE FOAM FABRICATORS, LLC

Product List:

Packaging and Protective Sheets:

- 48" x 96" EPS Sheets in any thickness down to ½" thick
- Custom Packaging Materials: any relative dimension L x W x H, including cylindrical radius and diameter dimensions for unique shipping needs.

Panel Systems:

- Roof Panels
 - Integrated Roof Panel system: EPS flute fill and top board into one piece. Custom fabrications to fit flutes and roof edges with overlapping or interlocking edges.
 - Flute Fill: EPS material for metal roof renovations.
 - Top board sheets under membrane.
- Wall Panels
 - Insulated wall panels with customizable thickness and lengths based on project R-value requirements.
 - Adhered to Sheetrock, OSB, Luan material or virtually any finish material.
 - Notched at dimension on center for electrical or piping chases.
 - Custom layout and fabrication available to support fit field dimensions.
 - Taper cuts to support tight fit tolerances.

Precast Concrete Applications:

- Precast wall form panels.
- Customizable thickness and lengths for complex projects
- Notched at dimension on center for rebar, electrical or piping chases.
- Specialty EPS fabrications for injection molds, and precast concrete electrical and piping formwork.

TENNESSEE FOAM FABRICATORS, LLC

Custom Applications:

- Custom EPS shapes for various applications
- Store signs, cones, crown molding.
- Precise cut and measurements

Geofoam:

- Fill material
- Sized up to 48" x 48" x 96" for easy placement.
- Reduces labor costs and construction times.

Material Available in Various Densities: 1lb, 1.25lb, 1.5lb, 2lb, and 3lb.
(Spec sheets available per request.)
